PROFESSIONAL SUMMARY

Junior Graphic Designer and UX/UI Designer, with experience in creating advertising campaigns for various industries such as restaurants, bars, hospitals, and gyms. I specialize in combining visual creativity with a focus on user experience, paying close attention to every detail of the design process. Accustomed to working both independently and collaboratively, I stand out for my responsibility, discipline, and initiative. I also have the ability to perform well under pressure, delivering effective visual solutions within tight deadlines.

Proficient in Adobe Illustrator, Photoshop, and InDesign, Figma, with proven experience developing technical illustrations, schematics, branding assets, and optimized images for both print and digital platforms.

WORK EXPERIENCE

Freelance Graphic Designer - *VARIOUS CLIENTS – NATIONAL AND INTERNATIONAL*
Graphic Designer
2018 – 2025

- Created graphic content for social media, advertising campaigns, brand identity, and print materials.
- Developed branding strategies for startups, restaurants, gyms, and healthcare services.
- Collaborated directly with clients to understand their goals and translate them into effective visual solutions.
- Managed multiple projects simultaneously, consistently meeting tight deadlines and maintaining high quality standards.

Cutting Fast - *TABASCO MEXICO*
Junior Graphic Designer
2015 – 2018

- Designed social media advertising for restaurants, cafes, bars, gyms, and businesses, increasing visibility and engagement on digital platforms.
- Created invitations, brochures, t-shirts, hats, magazines, business cards, and banners.
- Coordinated with clients to ensure designs reflected their brand and messaging accurately.

FIGUEROA DESIGN- *TABASCO MEXICO*
Junior Graphic Designer
2014 – 2015

- Developed advertising content for various businesses on social media, including bars, restaurants, and hospitals.
- Worked with clients to generate visual campaigns that reflected their needs and objectives.
- Preparing press-ready artwork and digital files for a variety of printed materials such as brochures, magazines, invitations, and large-format banners.

PROJECTS

Strong ability to translate complex concepts into clear and visually engaging graphics, demonstrated through app design projects (Travely, NESCAFÉ Connect) that required simplifying information into intuitive visuals.

NESCAFÉ Connect – Coffee Recommendation & Subscription Platform

In collaboration with EBAC LATAM
January – June 2025

I designed the full architecture of a coffee recommendation and subscription app, tailored to users' taste preferences, brewing methods, and consumption habits.

Using UX Research methodologies such as AEIOU, empathy mapping, user personas, and journey mapping, I identified real user needs and design opportunities. The prototype—built in Figma—included onboarding, interactive catalog, personalized profile, community features, challenges, address management, and subscription tracking.

I carefully crafted a visual identity aligned with NESCAFÉ's branding, integrating dynamic product categories based on flavor intensity, speed, sustainability, and gourmet choices.

I conducted usability testing with diverse user profiles, identifying areas to improve copywriting, navigation, and microinteractions. The project concluded with an interactive prototype that demonstrates functional micro and macro interactions and delivers a seamless and emotionally engaging experience.

LOOK AT THE PROTOTYPE

Travely – Group Trip Planning App

In collaboration with EBAC LATAM
January – June 2025

Travely is a collaborative travel planning app designed to help groups manage shared trips—covering budgets, itineraries, accommodations, and expenses in one place.

I developed the concept from scratch, starting with user research through surveys and interviews to uncover pain points and expectations. Using the Design Thinking process, I defined personas, user problems, and design opportunities.

I built user flows and low/high-fidelity wireframes in Figma, and designed a visually appealing interface focused on glassmorphism, accessibility, and a cohesive identity (typography, color palette, and custom icon system).

I documented a complete design system and ran usability tests with real users, which revealed areas for improvement such as visibility of key actions ("invite a friend" button), back-navigation, and payment screen clarity.

Based on feedback, I refined and redesigned critical screens like "Add Expense" and "Itinerary", enhancing clarity, hierarchy, and usability.

SKILLS

- Marketing
- Innovation
- Attention to detail
- Effective communication
- Teamwork
- Creativity
- After Effects
- Photoshop
- InDesign
- Illustrator
- Figma

EDUCATION

British School of Creative Arts and Technology UX/UI DESIGN 2025
Universidad Autónoma de Guadalajara SPECIALIZATION IN MARKETING 2016
Universidad Autónoma de Guadalajara BACHELOR'S DEGREE IN GRAPHIC DESIGN 2012 – 2015
